

Example of Project Engagement

Organisation	Project	Content
	Delivery Projects	<ul style="list-style-type: none"> Delivery of mobile telephony infrastructure projects, collaborating with R&D, Supply Chain and customers for new product launch.
	Business Development	<ul style="list-style-type: none"> Supporting service providers and partner-led projects delivering comprehensive network solutions, including switching, security, WLAN, and IP telephony systems.
	Business Development	<ul style="list-style-type: none"> Promotion and implemented Microsoft desktop, server, and email solutions.
	IT Delivery	<ul style="list-style-type: none"> Delivery of various IT applications for web-portals, R&D, datamining, calculations program, service platforms, outsourcing services of IT and laboratory equipment integration as well as hospital equipment.
	IT Delivery	<ul style="list-style-type: none"> Delivery of ERP systems, WAN/telecom infrastructure, and e-commerce solutions.
	Infrastructure Project	<ul style="list-style-type: none"> Support of mega large-scale energy infrastructure projects, including turbines, generators, switchgear for nuclear and solar distribution systems, with a focus on security for production plants.
	Infrastructure Projects	<ul style="list-style-type: none"> Delivery of fibre optic infrastructure projects, including associated civil & construction works.
	R&D Projects	<ul style="list-style-type: none"> Renewable bioenergy research projects, including carbon capture and storage (CCS) feasibility studies. As well as customer data migration to Azure at pulp and process plant.
	Infrastructure Projects	<ul style="list-style-type: none"> Delivered energy and heat production infrastructure, including SCADA systems for monitoring and control of production facilities.
	IT Projects	<ul style="list-style-type: none"> Application migration project to Microsoft Azure cloud services, as well as upgraded IT service infrastructure and implementation of technical control and regulatory systems for oil refinery operations, including experimental AI project for refine operations.
	Infrastructure Project	<ul style="list-style-type: none"> Investments for civil & construction for subway transportation systems including train tracks, electricity, signal, security and telecom initiatives.
